In order to take part in the walks, you do not have to be an elite athlete; however you should be relatively fit and well-rested if you wish to enjoy your cruise to the full.

Your equipment

### Rucksack

It is essential that you bring a rucksack or back pack with you with a 30-litre maximum capacity. Your rucksack should easily hold a sweater, waterproof clothing, picnic items, a water bottle and sun protection - vital when you go out on any walk or ramble.

Your choice of rucksack will have a great influence on your comfort and therefore your enjoyment during your walks. Ensure you bring a sturdy rucksack of an appropriate size which has padded straps and is made of a tough, waterproof material.

Please note that no portage is provided during walks.

### Shoes

Good shoes must be comfortable above anything else and must not rub or damage your feet. Ensure you are happy with your shoes, and try them out before you travel.

Whatever degree of difficulty might be envisaged for the walks, please ensure the soles of your shoes are high-quality. They should be well-stitched and you should not slip when walking on any type of terrain, be it wet or dry. We would advise you choose shoes fitted with shock-absorbing soles which will help you to avoid malleolus fractures, back injuries and damage to your joints.

### Clothing

It is essential that a walker's kit should always include:

- undergarments with the correct degree of thickness and warmth appropriate for the type of walks envisaged
- lightweight trousers that dry quickly
- a fleece or woollen pullover
- a cagoule or rain cape
- hat or cap
- lightweight gloves and hat can be welcome items in early and late season

### Other equipment

You should consider bringing the following items:

- sunglasses
- sun cream
- any personal first aid items or medication (see below)
- a flask or water bottle
- toilet paper
- pocket knife
- telescopic walking poles for those accustomed to using them (recommended for the Douro and for Croatia)

### Medication and first aid items

Please note that our group leaders always carry a first aid kit on all our walks.

However, it is essential that you bring your own personal first aid kit, the contents of which will vary according to the destination, but which should contain at least the following items:

- sticking plaster or Elastoplast
- "second skin" elastic adhesive bandages
- analgesic or pain relief
- mosquito repellent if necessary
- eye wash or antiseptic eye lotion
- an intestinal antiseptic

Plus any personal or prescription medication if you are on a course of treatment.
